It is a great game with a lot of opportunities. The game nicely mixes mythology and history with simple but complicated farming adventure.

Anyone who plays the game should know that the game is still in early access. It will be developed well. And the bugs will surely be fixed.. -It says that it's translated into 27 languages - what do you think if this true (no)

-The same model of the girl copied over and over and over again in different dresses makes me think that they simply spent all their budget on a *Nude patch*

-The game halts and freezes every now and then, controls are bad and as a game, this is below average as well.

+There is one big plus - the game was on discount and very cheap, now it's not and cards cost 4 times more than the game was.

+It has nice steam emotes and rare background with bewbs. This game, a side scroller I would like to say is very enjoyable. It's not too easy nor is it too hard. There is a story to follow, although it does take a more silent role in the game, but it allows the player to interpret what the characters are saying. Combat is easy to handle and overall is balanced. It may have to deal with Zombies, but the concept or the hidden story behind this game may be more than a regular zombie shooter, and I would like to see it possibly grow. Overall I would have to give it two thumbs up.. Visually it's ok but it's boring as hell.. Chloe is the best :LOving:. Game is enjoyable to play. It has several unique challenges with more on the way I hope. Would like to see some pop ups with good guys and bad guys. Score points by taking out the bad guys and lose points by hitting the good guys. Would also like to see game utilize the Vive Tracker on a model rifle to do long range (600 to 1200 yard) target practice. At that distance bullet drop, wind and temperatures would all have to be compensated for. I highly recommend this game. Can't beat it for the price

A lot of people don't seem to like this game. (I guess if you expect platforming and controls similar to Supermeat Boy, that could be a problem.)

This is a fun little game that reminds me of Commander Keen (sans pogo stick) and a little of Metroid for some reason.

If you want a game that lets you brag about how sooper-1337 you are, don't buy this. If you just want a fun casual game, give this a shot!. What a dud. Drab brown houses and more boring brown houses. Kind of looks like the neighborhood burned down.. 12 hour? more like 5 minute. i played for 5 minute. 300 second is five minute in second. Fun, interesting game that manages to be deeply informative without being boring or preachy. I hope the devs continue down this path, as each game they've made has built on and improved the previous.. It's a good game and I do recommend it, but I have one criticism: the online multiplayer.

The game is set up so you can take effectively as long as you want to plan your move. You can start several games, which can last days, and just enter your move in when you feel like it and go away while you wait for the opponent to make their move. The problem with this is that inevitably people forget or get bored waiting, and I'd always start games with someone only to have them make one move and never be seen again. I get that the point of this game is that you can spend time carefully planning your move: but there needs to be a way to keep people online for the duration of the match because in my experience, once one player logs off, the game will never be finished.

At least, this is what the game was like when I first got it. Now there are only ever a couple of people online at a time and they never accept game requests. Probably people got frustrated and just stopped playing the online version.

Having said all that, the single player mode is good, there are options for single matches, tournaments and a career mode, and the AI is pretty good (at least compared to me). If I remember correctly, I got the game on sale, and I'm not sure its worth nearly \u00a320, so maybe wait until its a little cheaper.. \u2665\u2665\u2665\u2665 This Game. Update:

I now completed the game, took me 33 hours and I loved every minute of it.

The story line had me hooked from the beginning. I fell in love with the characters and their lives in the school.

The artwork is exquisite, full of rich colours with a classical style. The music is full of emotion and joy but yet simple.

The seiyuu, voice actors are world class, especially the main character Shirahane Suou, voiced by Nazuka Kaori.

The characters as the story went further on grow a little, you can see the changes in their actions.

Few points about the game, the first time you play, you are forced to do the Mayuri-chans route, once you finish that, you can replay and start Rikka-chan. There is many endings, but only one good ending.

The entire Flower series is broken into four games and while each game is complete in itself, they are connected, let's hope they come to Steam in the next year.

There are many VN's out there but few as rich as this one, it's totally worth the price, I was shocked that it wasn't more expensive like others, but very happy otherwise I wouldn't had been able to enjoy the game and support the developers for this star of a game.. This is one solid horror indie game that definitely deserves more attention. A good one, I must say, a very good one. The game writing seems like the work of the professional and I haven't encountered any technical issues. The combination of these features is actually pretty uncommon these days.. Pretty fun game, excellent time waster. There are a few bugs in it that need to be fixed though, like endless mode is just full of bugs when you start getting long. My main problem is that you have basically no control over your bus when you jump and on the farm stage the sun can often be rather blinding but other than that its a good game 8/10. very unique however play the campaign first before you play battle(skirmish basiclly) because Ai's will atack you very soon even on easy its quite hard
